

IMMEDIATE OPENING – FULL TIME POSITION
• MACHINIST / ASSEMBLER •

Diversified Technologies, Inc. (“DTI”) seeks a machinist / assembler to join its team in a fast moving, high technology business. This position supports both the development of new technologies and ongoing efforts to construct, install and test specialized, high-power electrical equipment for industrial and governmental applications. This is a great opportunity for someone eager to work in a challenging, innovative, technical organization that values individual contributions. Send resumes to jobs@divtecs.com.

Responsibilities:

Machinist

- Fabricate mechanical and sheet metal parts for prototype and production assemblies (typically small quantities).
- Develop tooling, operate shop equipment including lathes, milling machines, grinders, sheet metal shears, brakes, manual equipment.
- Read electronic and written specifications documents, plan efficient steps for cutting and finishing operations.
- Perform routine maintenance on machines.
- Use measuring tools.

Assembler

- Occasionally assist engineers with design and assembly of electro-mechanical components.
- Read and understand the schematic diagrams, product manuals, process documents.
- Review bills of material, and perform pre- and post-assembly inspections of components.

Requirements:

- Ten years as machinist, ideally in a research and development / prototype environment.
- Demonstrable familiarity with hand tools and associated safety requirements.
- Able to fabricate parts from sketches and hand drawings. Knowledge of machining steel, aluminum, titanium, plastics, silicon and other materials.
- Demonstrable ability to work effectively in a team setting with attention to detail.
- Able to travel occasionally (domestic and foreign).
- US Citizen or Permanent Resident.

Applicants Seeking Part-time Work Will Be Considered

Excellent Benefits: Include health, dental, life, and disability insurance; 401K Plan; tuition reimbursement; paid holidays, sick leave and fifteen vacation days beginning year one.

Company Information: DTI develops and markets high power modulators, DC power supplies and control systems. Twice selected by R&D Magazine as one of the 100 most significant products of the year, DTI’s PowerMod™ systems are produced and sold in a wide range of configurations. DTI also provides consulting services to engineering and development projects. Please take a moment to browse our website at www.divtecs.com.

DTI is an Equal Opportunity Employer: Female / Male / Disabled / Veteran

DTI makes reasonable accommodation for persons with disabilities to apply for employment. Contact jobs@divtecs.com to request a reasonable accommodation.
